

No. 3, SEPTEMBER 1, 1936

HELMER, O. M. An unsaturated fatty acid fraction of pig pancreas which inhibits the growth of chicken sarcoma.....	333
MOEN, JOHANNES K., and SWIFT, HOMER F. Tissue culture studies on bacterial hypersensitivity. I. Tuberculin-sensitive tissues. Plates 22 and 23.....	339
MOEN, JOHANNES K. Tissue culture studies on bacterial hypersensitivity. II. Reactions of tissues from guinea pigs infected with group C hemolytic streptococci.....	355
GOODNER, KENNETH, and HORSFALL, FRANK L., JR. The protective action of Type I antipneumococcus serum in mice. IV. The prozone.....	369
GOODNER, KENNETH, and HORSFALL, FRANK L., JR. The protective action of Type I antipneumococcus serum in mice. V. The effect of added lipids on the protective mechanism.....	377
ROUS, PEYTON, KIDD, JOHN G., and BEARD, J. W. Observations on the relation of the virus causing rabbit papillomas to the cancers deriving therefrom. I. The influence of the host species and of the pathogenic activity and concentration of the virus. Plates 24 to 26.....	385

	PAGE
ROUS, PEYTON, BEARD, J. W., and KIDD, JOHN G. Observations on the relation of the virus causing rabbit papillomas to the cancers deriving therefrom. II. The evidence provided by the tumors: general considerations. Plates 27 to 33.	401
ENDERS, JOHN F., WU, CHAO-JEN, and SHAFFER, MORRIS F. Studies on natural immunity to pneumococcus Type III. IV. Observations on a non-type specific humoral factor involved in resistance to pneumococcus Type III.	425
PARKER, ROBERT F., and RIVERS, THOMAS M. Immunological and chemical investigations of vaccine virus. IV. Statistical studies of elementary bodies in relation to infection and agglutination.	439
CASEY, ALBERT E., ROSAHN, PAUL D., HU, CH'UAN-K'UEI, and PEARCE, LOUISE. The hemacytological constitution of adult male rabbits from fifteen standard breeds.	453
HEYMANN, WALTER. Nitrogen, potassium, sodium, and chlorine metabolism in rickets, with special reference to biliary fistula rickets in puppies.	471
MENKIN, VALY. Studies on inflammation. XII. Mechanism of increased capillary permeability. A critique of the histamine hypothesis. Plate 34.	485
