

## NO. 6, JUNE 1, 1947

SULKIN, S. EDWARD, and ZARAFONETIS, CHRISTINE. Influence of anesthesia on experimental neurotropic virus infections. II. <i>In vitro</i> studies with the viruses of Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies.	559
HAWN, CLINTON VAN ZANDT, and JANEWAY, CHARLES A. Histological and serological sequences in experimental hypersensitivity. Plates 32 to 34	571
TODD, EDGAR W. A study of the inhibition of streptococcal proteinase by sera of normal and immune animals and of patients infected with group A hemolytic streptococci	591
ALEXANDER, HATTIE E., and LEIDY, GRACE. Mode of action of streptomycin on Type b <i>Haemophilus influenzae</i> . II. Nature of resistant variants	607
HORSFALL, FRANK L., JR., and MCCARTY, MACLYN. The modifying effects of certain substances of bacterial origin on the course of infection with pneumonia virus of mice (PVM)	623
PECK, JOHN L., and SABIN, ALBERT B. Multiplication and spread of the virus of St. Louis encephalitis in mice with special emphasis on its fate in the alimentary tract	647
TRAGER, WILLIAM. The relation to the course of avian malaria of biotin and a fat-soluble material having the biological activities of biotin	663
KABAT, ELVIN A., BENDICH, AARON, BEZER, ADA E., and BEISER, SAM M. Immunochemical studies on blood groups. IV. Preparation of blood group A substances from human sources and a comparison of their chemical and immunochemical properties with those of the blood group A substance from hog stomach	685
ADAMS, MARK H., HENDEE, EDELMIRA D., and PAPPENHEIMER, A. M., JR. Factors involved in production of <i>Clostridium welchii</i> alpha toxin	701
RACKER, E., and KRIMSKY, I. Relation of iron salts to inhibition of glycolysis by Theiler FA virus of mouse encephalomyelitis	715
PUCK, THEODORE T. The mechanism of aerial disinfection by glycols and other chemical agents. I. Demonstration that the germicidal action occurs through the agency of the vapor phase	729
PUCK, THEODORE T. The mechanism of aerial disinfection by glycols and other chemical agents. II. An analysis of the factors governing the efficiency of chemical disinfection of the air	741
